

Don't break a date with your dentist!

Regular dental visits can prevent many oral health problems or help identify them earlier when treatment may be simpler and more affordable.¹ In fact, every dollar you spend on preventive care may save you money later in restorative care and emergency procedures.²

Remember that exams and cleanings are **FULLY COVERED** when you see a **Delta Dental PPO™ dentist.**

So brush, floss and see your **PPO dentist** regularly to help maintain a healthy smile—and a healthy wallet!

Coverage levels may vary if you visit a non-PPO dentist. Remember you can still save money if the dentist participates in Delta Dental Premier®.

Nationwide, three out of four dentists are part of Delta Dental networks, which means members have many choices nearby.

To find a dentist in your area, use the online dentist search tool, or call customer service at 800-524-0149 (TTY users call 711).

A healthy smile and healthier you are just around the corner!
